

Highlights

- Rigid 8mm thick HDPE body with reinforced contoured structure and integrated rain lip provide maximum strength and durability.
- Adjustable sump neck, top frame conduit entry points and stabilizer bar predrilled shear valve mounts ensure fast and efficient installation.
- Large, open entry boot face provides ample space for boot installation.
- Combine with patented UPP electrofusion entry boots and pipework for fast installation while eliminating potential leak paths.

Approvals

- ULC listed.

UPP Dispenser Sumps

UPP brand dispenser sumps feature a rigid 8mm thick HDPE body with reinforced contoured structure and integrated rain lip allowing them to stand up to harsh forecourt conditions such as ground movement or hydrostatic pressure. The neck of UPP dispenser sumps can be trimmed to adjust for varying sump burial depths ensuring an efficient installation. In addition, the durable steel UPP dispenser sump top frames feature conduit entry points which allow conduit to enter the dispenser through the top frame without having to penetrate the sump wall. The galvanized steel stabilizer bars feature pre-drilled shear valve mount plates and spring channel nuts for quick mounting. UPP electrofusion entry boots allow you to connect UPP pipework directly to the dispenser sump, creating a solid, one-piece construction and eliminating potential leak paths.
