SERVICE STATION HARDWARE

PV-ZERO PRESSURE/ VACUUM VENT VALVE

The EBW® brand PV-ZERO pressure/vacuum vent valve provides an innovative solution for tank venting needs. The patented liquid trap design utilizes vapor pressure to provide positive and negative pressure relief of an underground storage tank. The stainless steel design allows the PV-ZERO to be compatible with both gasoline and E85.

SIMPLE DESIGN

Provides a liquid-based pressure and vacuum venting system with no leak rate. No poppets, springs, or gaskets to rely on, get hung up, or accumulate dirt/debris over time causing obstruction and further increasing leak rate.

EASY INSTALLATION & SERVICE

Installed, serviced and tested from ground level eliminating the need for ladder or costly boom truck.

MEET YOUR FLOW RATE NEEDS

CARB Stage I EVR approved for use with gasoline and E85 underground storage tanks.
