

LOW LEVEL WATER FLOAT FOR DIESEL

The Low Level Water Float for Diesel provides increased water level detection down to $\frac{1}{4}$ ", delivering early indication of the presence of water inside diesel tanks.

HIGHLIGHTS

- Detects water down to $\frac{1}{4}$ ", compared to existing water floats which can only detect water at $\frac{3}{4}$ ".
- On a typical 8' x 8,000 gallon tank, the enhanced float can detect the presence of as little as 4 gallons of water.
- Designed for applications involving 4" riser pipes.
- Each float kit contains a Diesel Product Float and a Low Level Water Float.
- Each float kit includes a compact probe foot for easy installation on new or existing probes.
- Recommended for use with bottom mounted Digital Inventory and Leak Detection Probes (LL3 models).
- Compatible with EVO™ 200, EVO™ 400, EVO™ 600, EVO™ 6000 Automatic Tank Gauges (ATGs).
