

Fleet Management System

MAC FLEET

Homebase site management

CHARACTERISTICS

- Unattended operation without interruptions 24/7;
- Master – Master architecture: completely autonomous and independent management of the forecourt control system;
- Fully automated management of the forecourt: from the refueling in self-service mode to the automated transmission of the data to our management system Cardsmart Fleet 4.0
- Management and control of the operators with our Fillsmart technology;
- Internal printer (Only in the Mac Fleet TOP version);
- Customizations on request;
- Reduce fuel and maintenance costs of vehicles, misuse and losses;
- Custom reports for accounting, budgeting and consumption management;

The Mac Fleet Unit is our all-in-one solution for the automated and independent control of public and private homebase fleets.

The MAC Fleet is an autonomous terminal, capable of managing all the processes, devices and systems present in the homebase sites.

A COMPLETE AND FUTURE PROOF SOLUTION FOR THE HOMEBASE SITES

- Highly resistant and tested for an efficient use in all the operative scenarios.
- Capable to interface with any existing equipment in the forecourt (Dispenser, Atg, Carwash etc..)
- Innovation, ease of use and seamless integration with existing forecourt equipment are always at the forefront of our solutions.
