- Built-in alarms for operation-critical parameters and systems.

OfficeSmart is a modular portal solution with flexible and customizable design architecture, which allows you to easily tailor the interface and reporting tools to your specific needs and requirements. The intuitive GRAPHICAL user interface relies on accurate and precise back-end data, collected by our sophisticated forecourt operation systems and devices.

Management System OFFICESMART 4.0

Maser's Officesmart solution is the result of more than 30 years of hands-on experience in the petrol retail industry. OfficeSmart is a sophisticated management system for remote real-time monitoring of all critical forecourt systems. As all our solutions, Office Smart focusses on what is most important for the station/network owner – reliability, compliance, optimization and detailed reporting. The system empowers the company headquarters specialists to monitor and control remotely all important processes and systems, while collecting and structuring critical forecourt management, planning and analysis data.

ADDED VALUE

- Real-time critical systems data collection
- Real-time forecourt device operation monitoring
- Secured remote device SW updates and maintenance
- Built-in fuel stock analytics and delivery planning UTILITIES
- ERP integration-ready
- Remote site management

We know that, apart from real-time access, monitoring and controlling functions, what is critically important for a back-office system is accurate data collection. We have invested a great deal to make sure that all collected data is 100% accurate and analytically structured.
