The CARDSMART USER APP has a simple and intuitive UI. The Loyalty Card Holders can check and manage in real time all the information related to their loyalty cards using their mobile device, regardless of their location. The App allows you both to view and verify the data of your cards, and to intervene by managing top-ups (for debit cards) in an absolutely safe and secure way. The App sends real time transaction notifications.

CARD SMART USER APP

ADDED VALUE

- ➔ Verify your data from wherever you are
- ➔ Information presentation immediacy
- ➔ Developed specifically for mobile device
- ➔ Multilingual
- ➔ Multiplatform (Android / IOS)
- ➔ Infrastructure on premises
- ➔ Security and data protection

The owner of one or more cards can check the balance and transaction history of each card and / or on all cards, with total control in order to have peace of mind and security regarding the use of their cards. For Networks who manage cards for their loyal customers, this feature is to be considered a plus in terms of service offered.
