Our unique Master-Master software SYSTEM architecture delivers virtually no downtime operation experience. StoreSmart 4.0 is built to have complete functional redundancy with our MAC 4.0 outdoor payment terminal. So, if for some reason, one of the systems – the OPT or Store Smart 4.0 – is temporarily down/offline, the other one is capable of managing all critical forecourt devices and operations – Dispensers, Price totems, ATGs & Car-wash systems etc.

Maser's StoreSmart 4.0 system is designed to service all the needs of a petrol station manager. From the real-time management of all petrol products, to the retail and accountability of all convenience store items, StoreSmart's open and customizable architecture allows the station managers to tailor the system to THEIR specific operational and reporting needs. Storesmart 4.0 has built in utilities for real-time product price changes and timer-scheduled price changes, which you can schedule up in advance and are executed automatically at a future moment. The system allows the petrol station operators to run remote diagnostics for status of each dispenser, terminal, probe, etc. in real time. Storesmart 4.0 offers intuitive user interface utilities for real-time monitoring, reporting and reconciliation of all parameters of the sales/delivery/stock of fuel products and card/cash payment transactions. the system has built-in early-warning alerts for all critical fuel products related events.

ADDED VALUE

- ➔ Complete control of the service station infrastructure – Dispensers, OPTs, ATGs, Price Totems.
- ➔ Flexible and seamless integration with any fiscal, accounting, ERP, etc. systems.
- ➔ Our unique MASTER-MASTER (Store Smart 4.0 - MAC 4.0) system architecture ensures virtually no downtime of forecourt operations.
- ➔ Built-in accurate reporting tools and facilities, minimizing the possibility for fraud and human errors.
- ➔ Client-tailored to comply with market-specific regulatory and legislative requirements.
- ➔ The intuitive and easy to use touch screen interface reduces cashier-training time and increases a cashier's accuracy and speed.
- ➔ Designed according to the most stringent industry safety standards.

Storesmart 4.0 is equipped with our universal forecourt controller (maser ufc 4.0), which is capable of interfacing with all contemporary and legacy dispensers, atg systems, car wash systems and price totems. This built-in protocol conversion utility is an integral part of storesmart 4.0 and does not require an additional investment from our clients.
