

Management System

SMARTPOS NON-OIL 4.0

SITE «NON OIL» MANAGEMENT

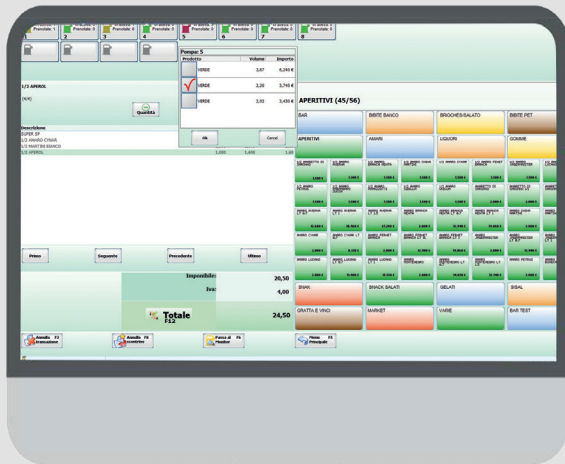

FEATURES

- Maximum PREVENTION OF human, errors, fraud and theft.
- Built-in customizable reports on all product sales/stock and payment transactions.
- Detailed transaction data logs.
- Built-in inventory management functions.
- Centralized price management with "product-by product" and "all products" mode.
- Historical price-change data logs.
- Secure real-time communication with HQ monitoring systems.
- Remote diagnostics for each cash point.
- Automated tel./SMS/e-mail emergency service and maintenance alerts.

SmartPOS Non-Oil 4.0 is a natural extension of our StoreSmart 4.0 solution, designed to manage the retail processes of all non-oil products at the convenience store.

Management System SMARTPOS NON-OIL 4.0

ADDED VALUE

- ➔ Full control of all of the sales in the service station: fuel, accessories, bars, restaurants and any activity involving retail sales
- ➔ The intuitive and easy to use menus and graphical interface decrease training and transaction times
- ➔ Seamless integration with any ERP or other management systems
- ➔ Easy to adapt to the client's specific needs and local legislation requirements

The modular and flexible software architecture is designed to be seamlessly tailored to the station/network owner's needs, products, processes and local legal, FISCAL and ACCOUNTING requirements.
